Warm and cool colours

The colour wheel can be divided into warm and cool colours.

Warm colours are bright and bold like red, yellow and orange colours.

Cool colours give a calm and cool effect like, green, blue and violet colours.

Warm colours

Cool colours

Colour Wheel

White, black and grey are considered to be Neutral Colours.

Neutral Colours

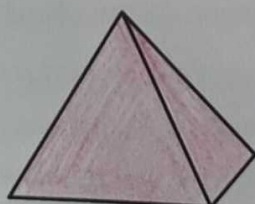

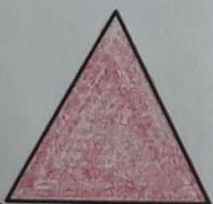

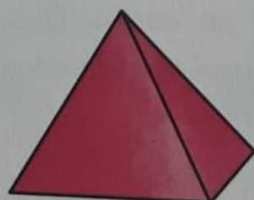

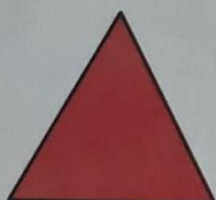

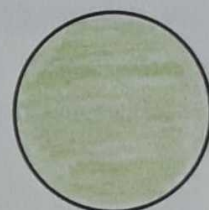

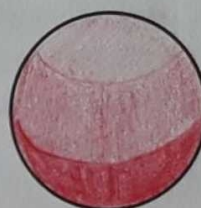

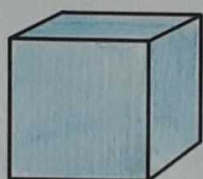

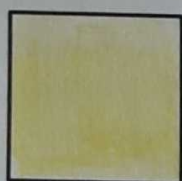

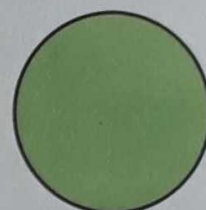

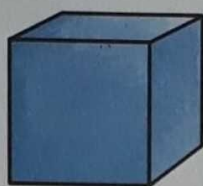

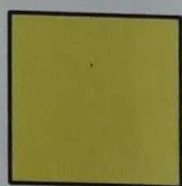

We have learned in the previous classes about primary and secondary colours. The given colour circles show how secondary colours are formed by mixing two or more primary colours. Like red and yellow make orange, red and blue make purple and blue and yellow make green.

SHAPES COLOURING

2D and 3D shapes are given below. Colour them using pencil colours.

TULIPS COLOURING

Use different shades of pencil colours to colour the tulips neatly.
