a) Aero flip                              b) Aero Peek                              c) Shake

Q D. Answer the following questions:-

Q 1. What do you understand by Windows Media Player?

Ans. Windows media player runs and organises the digital files (both audio and video) available in the computer's memory. We can listen to radio stations from all over the world if the computer is connected to the internet. This software allows us to play, copy, and create CDs/DVDs. It also helps to copy music and video files to portable devices.

Q 2. Differentiate between Ripping and Burning a CD.

Ans.

Ripping	Burning
1. When we copy files or songs from a CD to a computer, the process is known as Rip.	1. We can create our own CD/DVD by selecting a folder of software or media files and dragging it to CD/DVD icon in the computer folder. This process is known as Burning

Q 3. What is the use of Windows Media Center?

Ans. Windows Media Center has made watching TV, movies and other video content on our computer easier. With a cable connection, we can watch and record TV shows using Windows Media Center.

Q 4. How will you display two application windows, side by side?

Ans. In Windows 7, we can display two windows side by side. The steps are:

1. Open Microsoft Word and Microsoft PowerPoint programs, one by one.  
The PowerPoint Window is active at present.
2. Now right click anywhere on the blank portion of the Windows 7 taskbar.
3. Click on the Show windows side by side option from the shortcut menu.

Both the application windows will be displayed, side by side.
