

# MORE ABOUT SHAPES

We have already learnt about some basic shapes in class I.

Do you remember :

1. Name the shape :

Rectangle

Circle

Square

Triangle

2. Complete the pattern :

(a)

--	--	--	--	--	--	--	--

(b)

--	--	--	--	--	--	--	--

## Fun Time

### SUDOKU

Complete the grid using :-

- (a) 2 red rectangles
- (b) 2 green triangles
- (c) 2 yellow squares
- (d) 2 blue circles

Each column and each row must have one of each shape.

Also each block of four, outlined by dark lines must have one of each shape.

# Straight and Curved Lines

Have you seen these around you?

1. When the rope is held tight, it forms a **straight line**.  
Let us look at some more examples of straight lines.

2. When the rope is not held tight, it forms a **curved line**.  
Let us look at some more examples of curved lines.

Some shapes, letters and numbers are a combination of both straight and curved lines. Can you identify the straight and curved lines?

# Activity-1

1. Circle the correct answers :

(a) A letter with curved line only.

(b) A number with straight lines only.

(c) Letter with both curved and straight lines.

(d) A number with curved line only.

(e) A figure with straight lines only.

2. Look at the picture and count.

(a) Straight lines.

(b) Curved lines.

# Plane Shapes

**1. Square**  
A square has 4 sides and 4 corners (also called vertices). All the four sides are equal in length.

**2. Rectangle**  
A rectangle has 4 sides and 4 corners. The opposite sides of a rectangle are equal in length.

**3. Triangle**  
A triangle has 3 sides and 3 vertices. The sides of a triangle may or may not be equal in length.

**4. Circle**  
A circle has one curved side and no vertices.

**5. Oval**  
An oval is an elongated circle. It has one curved side and no vertices.

## Activity-2

Identify the shapes and complete the sentences.

1. (a) This is a Rectangle.
- (b) It has 4 sides.
- (c) It has 4 vertices.
- (d) Its opposite sides are equal in length.

2. (a) This is a Triangle.
- (b) It has 3 vertices.
- (c) It has 3 sides.

3. (a) This is a Circle.
- (b) It has no vertices.
- (c) It has one curved side.

4. (a) This is a Square.
- (b) It has 4 sides.
- (c) It has 4 vertices.
- (d) All its sides are equal in length.
